

# DALI RGB SENSOR

230V

IP20

DALI

The DALI RGB sensor has an active DALI interface which provides colour and intensity information to the controller. A variety of software allows to monitor the lighting of a target by a Sklaer projector thru internal commands  
Linked to a Sklaer

### DESCRIPTION

The DALI RGB sensor is programmable directly from the AELSYS controllers

- Different options allowing to measure the colour coordinates of
  - ambient light or
  - a target up to a distance of 20m
- Proprietary functions with Aelsys controller
- Application programmable thru controller or remotely by Wifi

PART NUMBER	DESCRIPTION
DALIRGB-30D	Active DALI RGB 30 deg viewing angle
DALIRGB-AMB	Active DALI RGB Ambient light detection

### ASSOCIATED PRODUCTS

PART NUMBER	DESCRIPTION
271A1015-1B	Nika 27 27-5790 DALI variable beam 12-50°
MODULO-DAL1/2	Can control 1/2 bus DALI
RGBSOFT	

### CHARACTERISTICS

DIN Rail  
Op temperatures  
 Ambient      -20° +50°C  
 Storage      -10 +70°C

The RGB sensor allows to monitor the lighting of a statue or any target depending of the ambient light, the position of the visitor and the sensibility of the curator
